Asana August Updates by i.DO

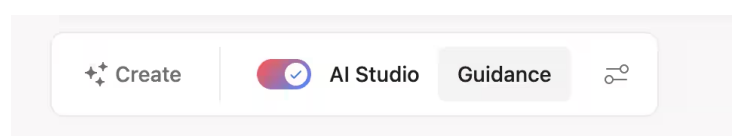

1- AI Studio & Automation

Words to workflows in AI Studio:

Create smart workflows by simply describing what you want in plain language, and let AI set up the triggers, conditions, and actions.

[Learn More](#)

Convert tasks to milestones with automation:

Use rules to automatically convert tasks into milestones for smoother project tracking.

Did you know?

As an **Asana AI Studio Certified Partner**, i.DO helps teams like yours **activate, customize, and optimize AI Studio** to get real business results faster.

👉 Right now, you can get an **exclusive 10% discount on activation** when you partner with us.

Contact i.DO 🤝

2- Insights & Integrations

Enhanced Power BI integration:

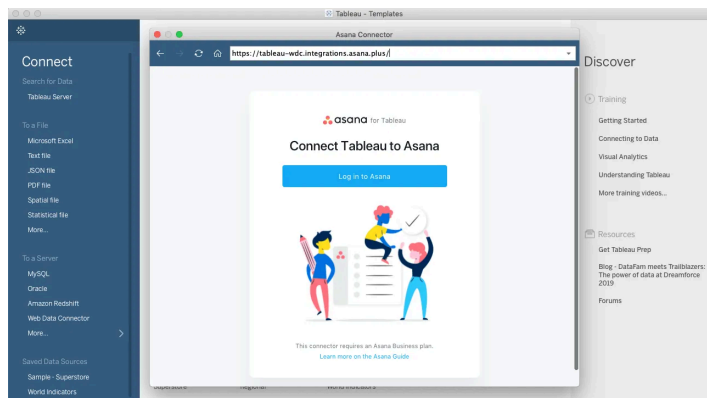

Export expanded data including portfolios, projects, subtasks, and custom fields, with improved table organization and faster refresh rates.

Learn More

Enhanced Tableau Connector:

Access comprehensive exports with improved refresh (every four hours) and optimized table structures for smarter BI analysis.

[Learn More](#)

Amazon Q index integration:

Connect Asana AI to your organization's Amazon Q index to surface knowledge from tools like Google Drive, SharePoint, Slack, and Salesforce.

Connect Amazon Q Business

Application ID

Retriever ID

Application region

IAM IDC Application ID

3- Project Management & Collaboration

Create multiple dashboard tabs:

Organize different reporting views by adding multiple dashboard tabs to projects and My tasks. Duplicate tabs for faster setup.

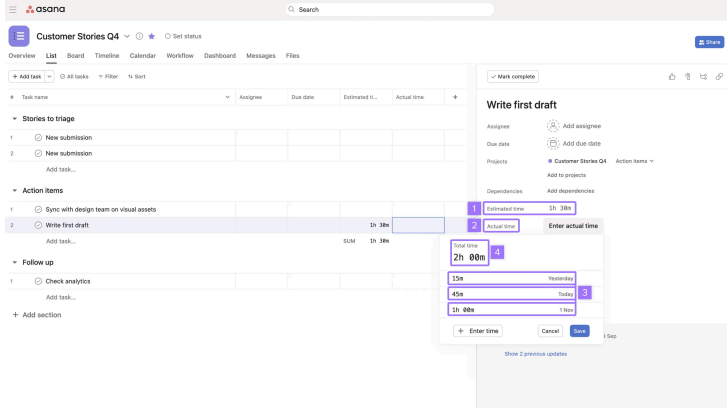

♥ **i.DO Tip:** Dedicate one dashboard tab per type of KPI or Goal

Attribute tracked time to a project:

Assign time entries to the right project of record for accurate billing and accounting.

♥ **i.DO Tip:** Keep finance happy — align tracked time with billing projects to avoid end-of-month surprises.

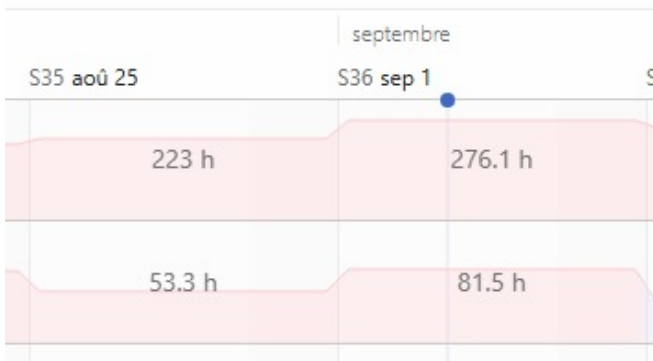

[Learn More](#)

Week numbers in workload & capacity planning

See week numbers displayed in workload and capacity planning views, especially useful for EMEA teams.

4- Enterprise-Exclusive Features

Private custom fields in rules and bundles:

Build workflows with private fields while protecting sensitive data.

i.DO Tip: Use private fields for confidential metrics (like budget or salary) and still automate around them safely.

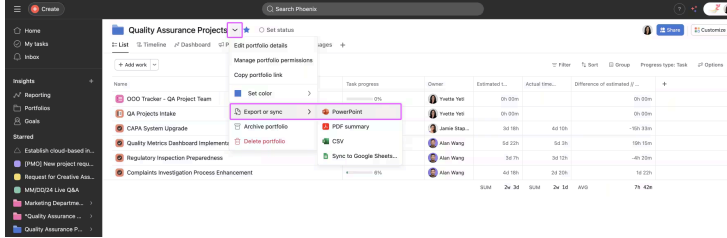

[Learn More](#)

Portfolio dashboard exports to PowerPoint:

Turn portfolio dashboards into ready-to-share PowerPoint slides for execs.

i.DO Tip: Save hours of slide-making — export dashboards straight to PowerPoint before leadership meetings.

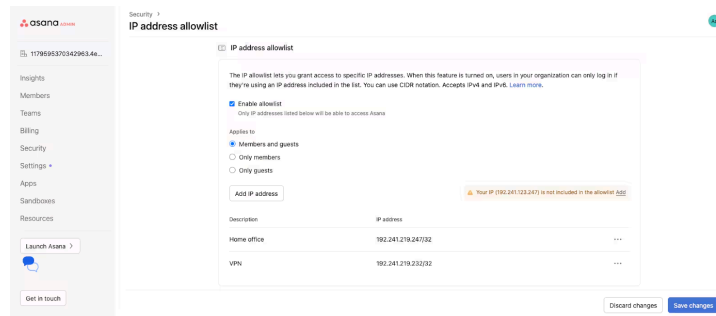

[Learn More](#)

IP allowlisting (Enterprise+):

Restrict access to your organization by IP address to meet strict compliance needs.
